meireles

Noble and imposing cooker

Forged with **professional** expertise

Born in the **flaming fire**

A fascinating **real steel**

meireles

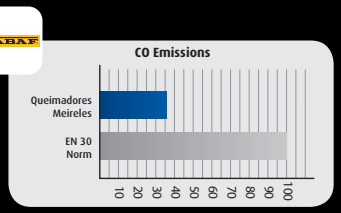

Hob Features

Heat source: Gas – Ideal to cook fast meals
It enables an instantaneous regulation of the power reaching quickly the right temperature, achieving this way great results. In addition, it allows the diversifcation of the household energy consumption.

Gas burners – Obtain excellent results and at the same time protect the environment
The Sabaf gas burners, synonym of high quality, guarantee high performances while ensuring substantially inferior emissions of monoxide carbon than the European norms oblige.

Automatic ignition – Comfort and effectiveness when you light the cooker
The automatic ignition of the burners is available in several models enabling a brisk and comfortable flaming simply by using the knobs or buttons integrated in the panel.

Protection – Details that make the difference
The security is in the details: the safety valves and the flame ignition are protected against impacts. The pan supports have a rubber with shock resistance, upgrading the stability and avoiding scratches in the hob.

Heat source: Electricity – Ideal to prepare meals with measured heating
The conventional electric plates are perfect to prepare slow and delicate meals, conserving their nutritional properties.

Triple burner – Cooks faster with less smoke
The triple burners achieve advanced power with higher precision. This model improves the quality of cooking and prevents the oil to incinerate, therefore, emitting a reduced amount of smoke. The heat is distributed equally, optimizing the meal.

Safety valves – Tranquillity while you cook
The valve interrupts immediately the gas flux if the flame turns off accidently.

Cast iron pan supports – Functionality and elegance
Featured on professional cookers, the cast iron pan supports assist the heat transmission, allowing the pans and pots to achieve faster the desired temperature.
Its harmonious design completes the aesthetics of the cookers.

Ceramic hob – Savings and comfort
The ceramic hob allows you to reach the correct temperature faster than with traditional electric plates, transmitting heat exclusively in the serigraphic area of the glass.
Simple to clean, they also allow to obtain delicious meals saving energetic resources.

Oven Features

Gas ovens – Simplicity and effectiveness on your cooking
Easy to work, the gas ovens allow to obtain a homoge - neous temperature in the entire oven, cooking rapidly with excellent results.

Timer – Safety and comfort
The timer signals a ring warning at the end of the scheduled time, so you know when the meal is ready.

Digital timer – Easy visualization
The digital timer allows you to program and receive a warnings for each cooking time, without disconnecting the oven, this way you know when the meal is ready. It also shows you the actual time. Option in gas ovens.

Telescopic Guides - Better comfort and security
The new telescopic guides guarantee a soft and secure sliding of the grids and trays.

Full glass inner door – More efficiency and simpler cleaning
The full glass inner door has no steel frame, aestheti - cally more beautiful and resourceful, enables a better thermic protection due to the absence of metallic conducting elements.
The innovative glass removing system assures simple disassembly for you to effortlessly clean the inner and outer glass.

Electric ovens – Versatility and energy efficiency
Meant to elaborate meals with specific temperatures and programs, the electric ovens let you choose the designated program for each kind of food.
They combine a friendly user style with low consump - tion of power, accomplishing the best energy efficiency.

Digital timer with electronic programming – Cook under your schedules
The digital timer allows you to program the beginning and the end of each cooking time, connecting and disconnecting the oven for your comfort. Option in electric ovens.

Grill with closed door - A better atmosphere for your kitchen
Every gas and electric oven in our range allows using the grill with closed door. This innovation avoids the heat wasting and the disposal of smells, enabling en - ergy efficiency and a more pure environment.

Easy To Clean Enamel – Easy cleaning and more dura- bility for your oven
The new Easy to Clean enamel used in all our range it's less porous, presenting a vitreous surface, functioning as an anti-adherent.
Its special formula prevents the dirt to adhere in the interior walls of the oven, making the cleaning simpler and the lesser use of abrasive products reflected in a better durability of the oven.

Class A – The best energy effiency
The class A ovens allows a reduced consumption of energy, without compromising the oven performance.

New Meireles Monza Line

it embraces with perfection the tradition and innovation.
A line with robust, functional and aesthetically advanced cookers that fits easily in every environment giving it personality.
Cookers that use the design at the service of the senses and emotions boosting true artists in the kitchen, because cooking is an art.

Cooktop without screws
thanks to a new manufacturing process the cooktop of the Monza Line is screwless, an uniform cooktop where there isn't a place for incrustations.

More robust sides
with wider sides the cookers from the Monza Lina are more robust and aesthetically more elegant.

Cooling Fan - Automatic and valuable
Always that your oven is functioning above a medium temperature, the cooling fan turns on to cool down the temperature of the panel and door, this way guarantees your maximum security.

Push Pull Drawer
The 90cm models of the Monza Line are equipped with a new Push Pull drawer, a drawer of big dimensions that opens with a simple click.
